I. MISSION STATEMENT

The Southern Regional Library Facility (SRLF) serves UC libraries and their users by:

- *providing compact storage, security and environmental protection for little used and rare library materials;**
- *insuring access through accurate bibliographic information and location notes for these materials in on-line catalogs; and**
- *rapidly retrieving materials when requested.**

A knowledgeable and skilled staff provide these services using efficient and innovative technology.

II. SUMMARY

The year 1995/96 is significant for several major undertakings and new projects that were launched and/or completed for our depositing libraries.

The summer began with the SRLF providing move services to UCLA's Law Library. In the midst of a major building expansion project, 125,000 volumes of the Law Library collection were relocated to other campus buildings or were moved within the Law Library stacks. In the Fall, SRLF began planning for two other major moves: 300,000 volumes for UC Irvine and 200,000 items for UCLA's Film & Television Archive. To handle these moves, four additional staff were hired in temporary positions. SRLF processing and circulation staff also assisted in these moves, working overtime as drivers or organizing the receipt and shelving of collections at the SRLF end.

Several special processing projects were launched in 95/96. For UCLA Law Library SRLF staff keyed or edited brief bibliographic records for journal titles and then added item barcodes to the ORION records. For UC San Diego and for UC Santa Barbara, SRLF began its first efforts to access, enter, edit, and update records on local systems. The results of these projects were mixed. Valuable experience was gained by processing and systems staff, but productivity was generally slow and somewhat discouraging.

In November, the SRL Board approved transfer of the Preservation Microfilming Service from UCLA's Library Reprographic Service to the SRLF. The three-year pilot project began in the Spring with the installation of equipment and extensive training of staff. By the end of 95/96, the production of quality preservation microfilm was being provided to the southern UC campuses.

And in January, construction of SRLF Phase 2 was complete. The 88,000 square feet of additional storage space will allow for at least ten years of growth for the SRLF collections.

III. SIGNIFICANT EVENTS AND ACCOMPLISHMENTS

1. **New Receipts:** the SRLF received 340,619 new deposits from the five southern UC campuses in 1995/96, including 169,991 new items from the UCLA Film & Television Archive.
2. **Items processed and items added:** 116,187 new items were added to the collections. In addition, 7,740 items were reprocessed (as in reprocessing boxes in manuscript and archive collections as these are resorted, weeded, and recataloged, swapping existing items to new records because of title changes, etc.). Overall, 128,697 items were processed; this figure includes the new items added, items reprocessed, and problems flagged for return to the campuses.

The 1995/96 processing goal was 160,000 items (new receipts from campus libraries totaled 170,628). The processing shortfall of ca. 30,000 items is attributed to several factors that impacted productivity. During the year, SRLF processors worked on three special projects for depositing libraries. For UCLA's Law Library, staff created brief serial records in ORION and also edited existing ORION records for 135 legislative journal titles. Two SRLF processors worked on this project and added 6,948 new items to the collection. They also returned 279 duplicate items.

For UCSB, SRLF staff worked on the Nikic Brieflisting Project, a collection of materials primarily in Serbo-Croatian. Working from a printed guide, staff keyed brief bibliographic records and holdings records onto UCSB's Pegasus system. From Pegasus, bibliographic records were then loaded into Melvyl, after which the routine SRLF processing of these deposits could be completed. The process of keying brief records into Pegasus was very time consuming. On average, 2.7 brief records could be keyed per hour. Work on this project ceased in Spring 1996, after 590 titles had been entered onto Pegasus. SRLF and UCSB administrators agreed to stop work on the project due to mounting backlogs at the SRLF.

For UCSD, staff at the SRLF performed double-duty as they updated UCSD's Roger records to reflect SRLF deposit and location information for annex materials. Like the UCSB project, the routine SRLF processing of these deposits followed after the local system had been updated. By the end of June, 4,315 items had been updated for SRLF deposit, and 1,748 duplicate items were discarded in lieu of deposit.

In addition to the special projects, approximately 1.5 FTE staff time in the Processing Section was lost to other needs, including administrative computing and information systems work and extra staff diverted to work on paging from the Film & Television Archive collection.

3. **Paging Requests:** the SRLF filled 106,669 paging requests in 1995/96, an increase of 2.5% over the previous year.

4. **Construction of SRLF Phase 2** was completed in January, 1996.

Occupancy of Phase 2 space soon followed, with storage of the UCI temporary deposit beginning in late January, and the move and deposit of UCLA Film & Television Archive's collection commencing in February 1996.

Between December 1995 and April 1996, SRLF coordinated the purchase and installation of Gemtrac Video Cassette cabinets and microfilm cabinets for Phase 2 collections.

On March 27, 1996, Grand Opening Ceremonies for Phase 2 were attended by 185 guests.

5. **The SRLF HomePage** was mounted in January, 1996. The site provides links to web sites at all five southern UC campuses and their libraries.
6. **SRLF's Library Move Services** provided assistance to libraries and departments at UCLA and UCI. For UCLA: 169,991 items were moved from the Film & Television Archive to the SRLF; 125,000 items were relocated for the Law Library; and miscellaneous collections were moved for UCLA Library's Gift Section and Special Collections department. For UC Irvine: the SRLF moved 300,000 volumes, providing either temporary storage in SRLF Phase 2 or relocating volumes from the Main Library into the Science Library at UCI.
7. **SRLF moved the collection of 1,100 wall maps** from UCLA's Geography Department to the SRLF in July 1995. This collection was a gift to the Maps and Government Information Library at UCLA. SRLF created a simple finding aid for the collection in dBASE format after which the collection was cataloged by UCLA.
8. **The SRLF Preservation Microfilm Task Force** completed its charge and presented their proposal to move preservation microfilming from UCLA Library Reprographic Service to the SRLF. The SRL Board reviewed and approved this proposal in November 1995 as a three-year pilot project.

IV. COA

In January, preservation microfilm consultants Eileen Usovicz and Robert Mottice visited UCLA and the SRLF. With assistance from the consultants, specifications to modify work space and to provide a film processing center were defined, and details for a week-long training program were outlined. In the following months, electricians, plumbers, and carpenters completed all modifications to the work areas, after which cameras, inspection tables, and processing units were moved to and installed at the SRLF.

On April 22-26 the consultants returned to the SRLF for a week of training with staff from the SRLF (managers, filmer, and quality control assistants) and staff from the five southern campuses (Preservation Offices, their assistants, and other staff who place orders for microfilm).

In May 1996, Microfilm Technician Peter Lacson was transferred to the staff and the Preservation Microfilm Service began production at the SRLF.

9. In preparation to move ca. 200,000 items from the UCLA Film & Television Archive, job descriptions were written for Laborers and Laborer Supervisor in December 1995. In January, Steve Kutay was appointed to supervise the crew of four laborers and driver. The move of Film & Television collections began on February 5 and was completed in May.

The crew of movers was divided between locations at Television Center in Hollywood and the SRLF, and individuals were responsible for loading carts, transporting these to the SRLF, receiving, unloading, and shelving the materials at SRLF. The Archive's Preservation Collection was moved from Hollywood Vaults to the SRLF in June. In addition, approximately 40,000 video cassettes were reshelfed from SRLF Phase 1 Special Collections into the Gemtrac cabinets in Phase 2.

10. The Circulation/Interlibrary Lending area at the SRLF was remodeled and new workstations were installed in 1995/96.
11. Five new workstations were purchased. One station is dedicated for testing and training new network software. Four new workstations were installed in Public Service and Processing work areas. In addition, wiring for ten new token ring network connections was completed in June.

IV. GOALS AND STRATEGIES FOR 1996/97

1. **Participate in the UCLA/ORION2 planning and implementation process. The following SRLF staff will be working on design, implementation, and training teams for the new DRA system at UCLA:**

Claire Bellanti **Implementation & Steering Team**
Policy, Configuration & Workflow

Colleen Carlton **Policy, Configuration & Workflow**

Paul Barone **Testing Team**

John Doing **Testing Team**

Robert Freel **Training Team**

Karen May **Testing Team**

The SRLF will migrate to the new DRA system along with other current users of ORION. SRLF representation on the various ORION2 teams will ensure that processing and public service needs that are unique to the SRLF are provided for in the new system. As the implementation proceeds, SRLF staff will consult with representatives from the other southern UC campuses to discuss changes in processing systems and their impact on the local systems and Melvyl.

2. **Replace existing file server and provide fully functional workstations for all staff. The new DRA system, which operates in a client/server environment, requires that SRLF replace all dumb terminals at staff and public service points with new workstations. This process was begun in 1995/96 with the purchase of five new workstations and the upgrade of eight existing workstations. The list of new equipment and expansion of network connections in 1996/97 includes:**

- > **Purchase new file server for the SRLF LAN and migrate from the Novell operating system to WindowsNT**
- > **Upgrade existing workstations with more memory, CDROM drives and sound cards**
- > **Expand patch board capacity to the file server to accommodate 40 connections of workstations and servers**

- > Lease twenty (20) workstations for public service, processing, loan desk, and reading room locations
 - > Replace existing coaxial cable with new network cable and add new connections to support the twenty leased workstations
 - > Modify existing furniture configurations in the Processing Section to provide better work space and ergonomically designed functionality
3. Additional equipment purchases for 1996/97 include new photocopy machines and new book carts. These will be funded by Phase 2 equipment money.
4. Process 200,000 items, including all new deposits and the 40,000 volumes in backlog. Process and eliminate longstanding backlogs related to Melvyl update problems. As these problems are processed, SRLF staff will notify campus depositors to update the local system record with SRLF information. From the local system, Melvyl holdings location can then be updated.
5. Meet with campus cataloging and technical processing staff to review existing procedures and guidelines for problem reporting. The objective will be to build consensus among campuses and to reduce the types of problems that need reporting and/or return to the campus. End results hope to be increased productivity and more efficient processing at the SRLF.
6. Create barcode label inventory on Excel 5. Update the inventory on a monthly basis; produce quarterly reports to track barcode usage by size and format category. Use this inventory to project collection growth, to provide supply requirements, and to trigger notices for new barcode orders.
7. Produce final snapshot tape of the SRLF ORION file and send to DLA for loading and updating of campus holdings information. This will be done before SRLF moves to the new UCLA/DRA system. From this tape load, conflict reports for SR records that did not load can be printed for review and resolution before the migration to DRA.
8. Begin planning for DRA implementation and consider new options for processing deposits from non-UCLA libraries. SRLF prefers to exchange bibliographic and holdings information with the local campus systems directly, rather than via Melvyl. In 1996/97, staff from SRLF, UCLA, and the other campuses will meet to discuss implications of new processing methods and to determine programming needs at the local level and at the UCLA end.

9. **Improve statistics reports to better measure workloads and to allow for more accurate cost analysis in Public Service areas.**
10. **Begin barcoding the Film & Television Archive collections, and provide interim automated circulation tracking for use until the new DRA system is implemented.**
11. **Develop procedural guidelines for SRLF Preservation Microfilming Service. Produce written documentation of these guidelines in consultation with the Preservation Offices from the five southern UC campuses.**
12. **Perform a cost study of the Preservation Microfilming Service using the first-year production statistics and recommend adjusted price schedule based on this study.**
13. **In an effort to generate revenue and ensure a self-supporting operation, pursue orders and new clients for Preservation Microfilming with UC departments outside of the library system and with public and private institutions in the southern California region.**
14. **Analyze expenses and revenues for Preservation Microfilming and provide budget projections in an effort to balance expenses and revenues within the next two years.**

V. CONCERNS FOR OPERATIONS

1. **Prepare for the implementation of the New DRA system and the phase out of ORION.**

SRLF managers continue to participate actively in the design and implementation of the new DRA system. SRLF processing and public service supervisors will also participate in the testing and training phases of the implementation. Much is still unknown of the functionality of this new system and its impact on operations at the SRLF. However, we anticipate that dual systems may be running initially, and this may slow productivity in both processing and public service sections.

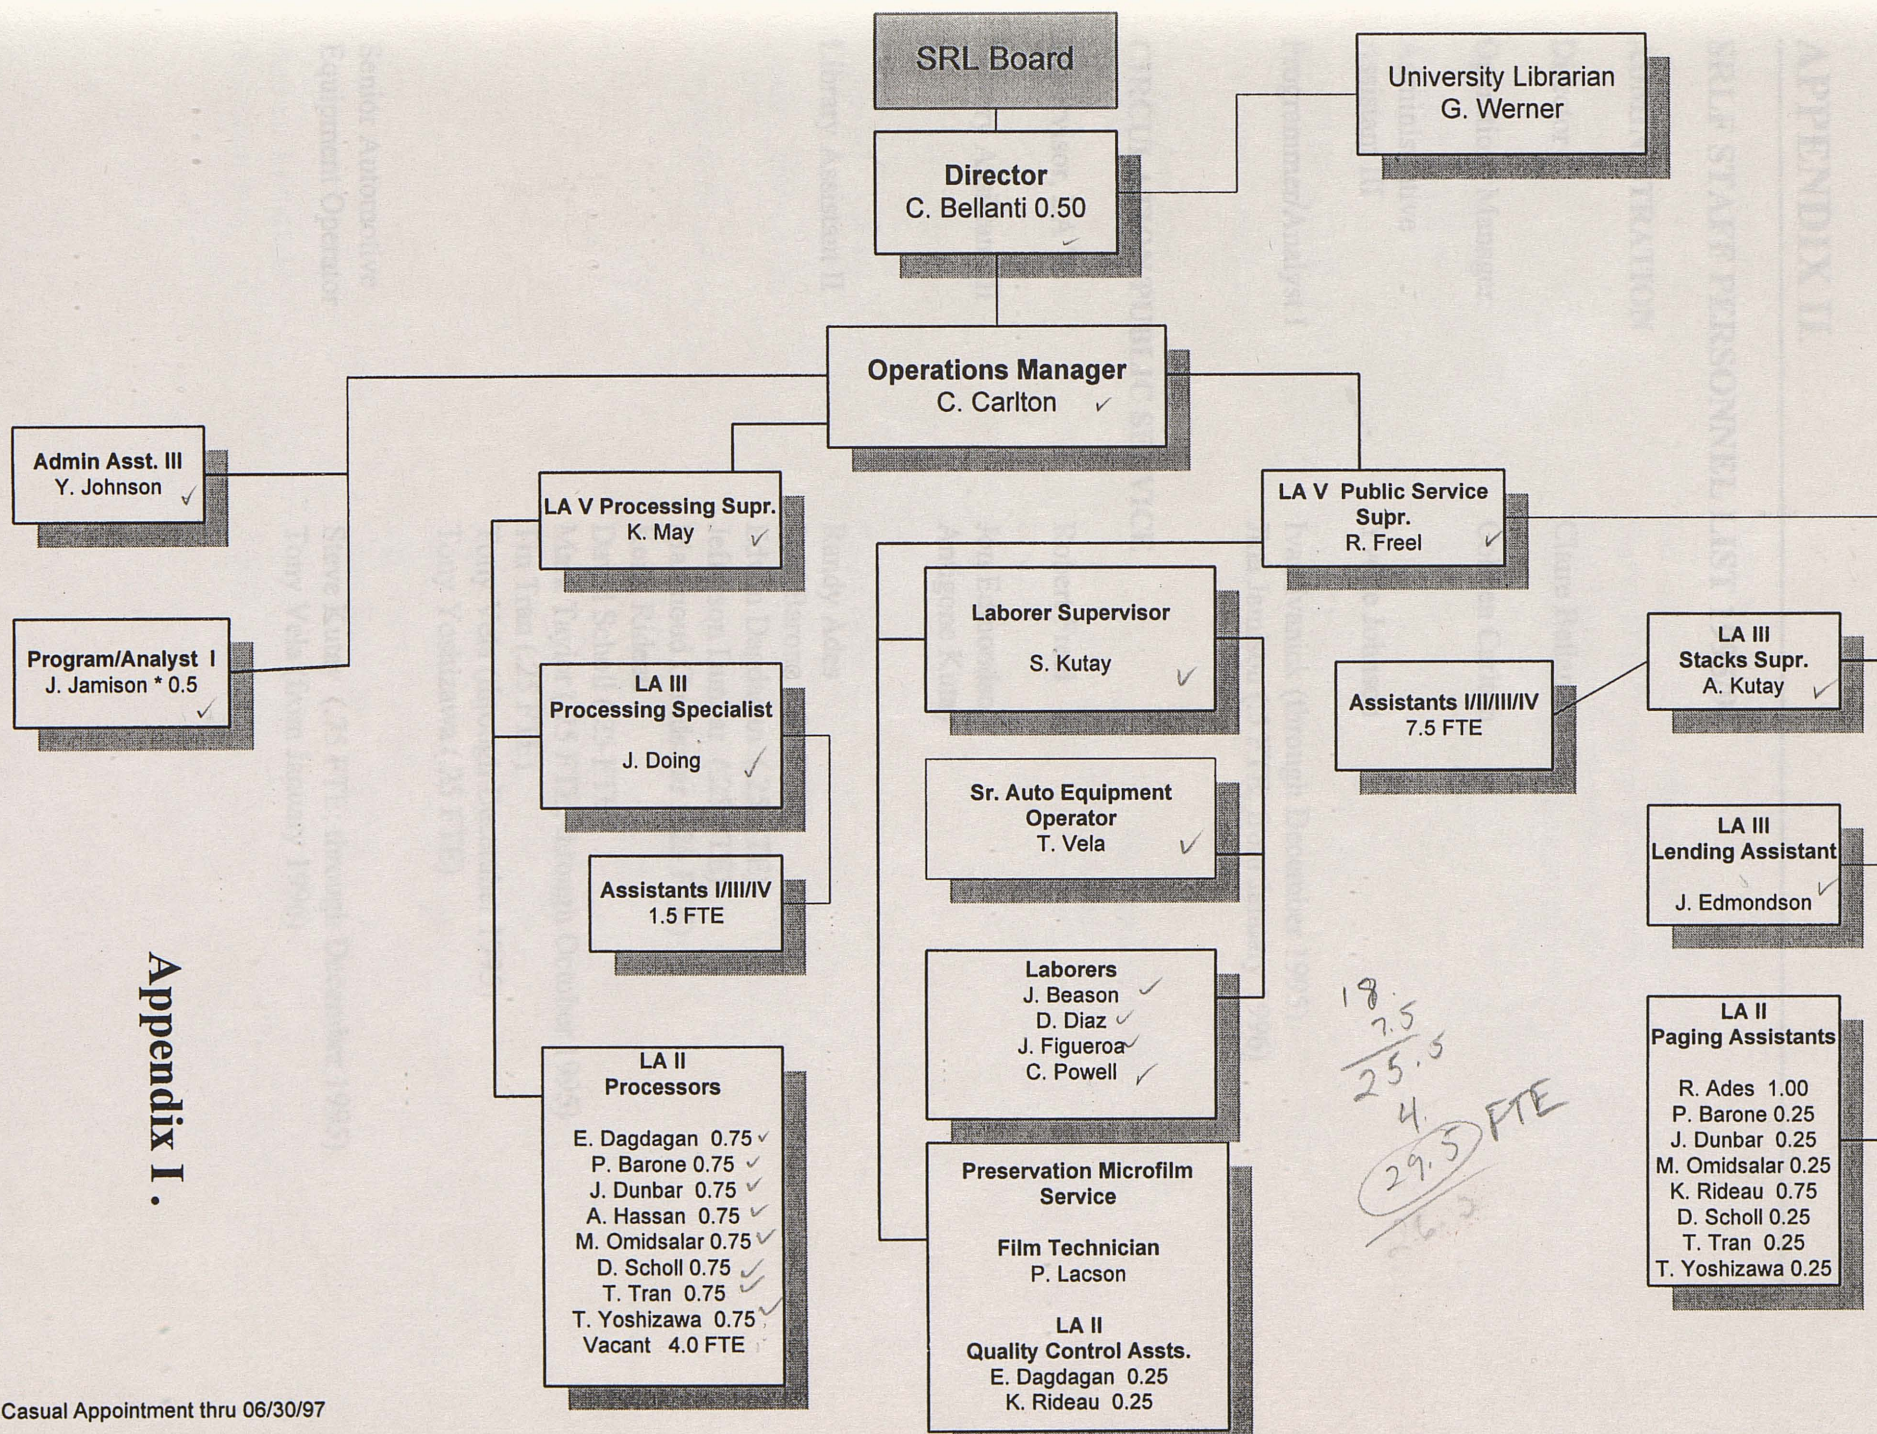

How new deposits are processed on the New DRA system will be very different from existing procedures. Dialog between UCLA, SRLF, and staff from the other four southern campuses must begin relatively early in the design and implementation process. Procedures for processing deposits will change and the SRLF will consult frequently with members of the Operations Committee and other campus representatives to ensure that service to depositors and their users are not adversely affected by these changes.

2. **Equipment upgrades and expansion of the network.**

In 1996/97, the SRLF will need to replace its file server with a new machine that is greater in storage capacity and speed, and is able to operate on WindowsNT. Operating funds in the 96/97 budget will be set aside for this major purchase. Twenty more workstations will need to be added to the local network, and these will be obtained through a lease program that the UCLA Library is negotiating. Associated with these workstations and the file server are peripheral equipment that will be purchased with remaining Phase 2 Equipment funds. These include expanded patch board, tape backup system, and UPS (Uninterrupted Power Supply) for the file server, and new cables and power supplies for scanners and light wands at each workstation.

Looking ahead, maintenance contracts on existing controllers that support the ORION terminals at the SRLF will end in 1997/98. Funds that are saved by canceling these contracts will help to pay for leased machines and other charges for the DRA system.

Organization Chart - June 30, 1996

Appendix I.

* Casual Appointment thru 06/30/97

APPENDIX II.

SRLF STAFF PERSONNEL LIST 1995/96

ADMINISTRATION

Director	Claire Bellanti
Operations Manager	Colleen Carlton
Administrative Assistant III	Yvette Johnson
Programmer/Analyst I	Ivan Ivanick (through December 1995) Jina Jamison (.5 FTE; from January 1996)

CIRCULATION/PUBLIC SERVICE

Supervisor, LA V	Robert Freel
Library Assistant III	Jon Edmondson Antigone Kutay
Library Assistant II	Randy Ades Paul Barone (.25 FTE) Edwin Dagdagan (.25 FTE) Jefferson Dunbar (.25 FTE) Mahmoud Omidsalar (.25 FTE) Keith Rideau David Scholl (.25 FTE) Mark Taylor (.25 FTE; through October 1995) Tin Tran (.25 FTE) Tony Vela (through December 1995) Tony Yoshizawa (.25 FTE)
Senior Automotive Equipment Operator	Steve Kutay (.75 FTE; through December 1995) Tony Vela (from January 1996)

APPENDIX III

Laborer Supervisor	Steve Kutay (from January 1996)
Laborer	Jon Beason (from February 1996) Darren Diaz (from February 1996) Juan Figueroa (from February 1996) Carnell Powell (from February 1996)
Student Assistants (Assts. 1-4, LA I)	7.5 FTE

PRESERVATION MICROFILMING SERVICE

Microfilm Technician	Peter Lacson (from May 1996)
Library Assistant II Quality Control	Edwin Dagdagan (.25 FTE; from May 1996) Keith Rideau (.25 FTE; from May 1996)

PROCESSING

Supervisor, LA V	Karen May
Library Assistant III	John Doing
Library Assistant II	Paul Barone (.75 FTE) Edwin Dagdagan (.75 FTE) Jefferson Dunbar (.75 FTE) Ali Hassan (.5 FTE) Steve Kutay (.25 FTE; through December 1995) Mahmoud Omidisalar (.75 FTE) David Scholl (.75 FTE) Mark Taylor (.75 FTE; through October 1995) Tin Tran (.75 FTE) Tony Yoshizawa (.75 FTE)
Student Assistants (Assistant 3-4)	.5 FTE
